

I am sending this comment in response to the idea that the New LPFM stations may take priority over the current FM translator service. FM translator services have been important to me and my family as without this service we would be unable to listen to good quality radio stations, such as K-LOVE. K-LOVE is a family centered positive programming, that provides wholesome values and has a great impact within my community and all across America. K-LOVE has provided an important avenue for younger children and teens in giving them an opportunity to have a choice in the type of music to hear. This is just one reason that I give monthly to this station to help them in a small way to continue providing a positive impact. Please preserve this service for all of us that enjoy the opportunity to have a CHOICE in what our family can listen to.
